

KPI Benchmarking Service

For Operations and Supply Chain Executives

Benchmark your operational performance against industry peers.

Validate performance metrics and drive continuous improvement in your organization.

Key Performance Indicator (KPI) Annual Benchmarking Survey—Winter 2011 Intake

Companies often fail to derive the full value from performance measurement because internal measures lack external perspective. To help members drive continuous improvement from KPI monitoring, OLEx has launched our annual KPI benchmarking survey to facilitate peer benchmarking on key operational metrics.

Benchmarking Features

With a vast network of large and medium size firms, OLEx can offer you:

1. Benchmarks for key operational processes in Manufacturing, Supply Chain, and Logistics;
2. External validation of internal metrics;
3. A customized industry report for your firm; and
4. A development plan for weak performance areas.

Build Your 2012 Dashboard

Establish baseline performance and identify improvement opportunities across the supply chain for your 2012 operating plan.

The OLEx KPI benchmarking service and analysis is included as part of membership.
